

College-Wide Personnel and Budget Committee - Statement of Principles on the Faculty Portfolio

*Approved at the meeting of the College-Wide Personnel and Budget Committee of October 29, 2024

The College-Wide Personnel and Budget Committee (CWPB) considers the faculty portfolio for reappointment, promotion, and tenure as a critical component in the faculty's professional journey. The portfolio allows the faculty to craft their narrative as to how they are meeting the requirements of their department, and the college, for advancement. As such, it is expected that Artificial Intelligence (AI) shall not be used in the final version of portfolio statements. If AI should be used in any other parts of the portfolio besides the statements, the CWPB expects that disciplinary-specific documentation will accompany any such usage.
