

**HOSTOS COMMUNITY COLLEGE  
DEPARTMENT OF MATHEMATICS AND COMPUTER SCIENCE**

<b>MAT 115</b>	<b>QUANTITATIVE REASONING (QR)</b>
<b>CREDIT:</b>	<b>3.0</b>
<b>EQUATED HOURS:</b>	<b>3.0</b>
<b>CLASS HOURS:</b>	<b>3.0</b>
<b>PREREQUISITES:</b>	<b>MAT020/PASSING THE PLACEMENT TEST</b>
<b>PRE/COREQUISITES</b>	<b>ESL/ENG 091</b>
<b>REQUIRED TEXTBOOK:</b>	<b>Bennet, J. and Briggs, W. <u>Using and Understanding Mathematics: A Quantitative Reasoning Approach</u>, 5<sup>th</sup> Ed., Pearson, c2011</b>
<b>REFERENCE:</b>	<b>Madison, B., et. al., Case Studies for Quantitative Reasoning: A Casebook of Media Articles, 2<sup>nd</sup> Ed., New York, NY: Pearson Custom Publishing, c2009</b>
<b>DESCRIPTION:</b>	<b>This course is designed to develop quantitative reasoning and critical thinking skills. Topics include logic and problem solving; quantitative information in everyday life; statistics and probability; modeling and further applications to address areas of contemporary interest.</b>
<b>EXAMINATIONS:</b>	<b>A midterm, a comprehensive final examination and project (computer or research).</b>
<b>GRADES:</b>	<b>A, A<sup>-</sup>, B<sup>+</sup>, B, B<sup>-</sup>, C<sup>+</sup>, C, D, I, F</b>

**STUDENT LEARNING OUTCOMES:**

1. Identify and understand propositions, truth tables, fallacies, inductive and deductive arguments and apply logically valid arguments to everyday situations.
2. Interpret and draw appropriate inferences of quantitative representations such as formulas, graphs and tables. With data from newspaper surveys, TV, the web, etc., students will critically examine applications.

3. Use algebraic, numerical, and graphical methods to draw accurate conclusions and solve mathematical problems involving mathematics of finance, fundamentals of statistics and probability, modeling functions, both linear and exponential.
4. Represent quantitative problems expressed in natural language in a suitable mathematical format such as algebraic, graphical or tabular form.
5. Effectively communicate quantitative analysis or solutions to mathematical problems in their own words as technical reports, written or oral.
6. Evaluate solutions to problems for reasonableness using a variety of means, including informed estimation, measures of center, spread or variation and probability.
7. Apply mathematical methods to problems in other fields of study and in a real world context. Demonstrate quantitative reasoning skills by evidence-based group project reports according to chosen fields-business, finance, economics, health, humanities, political science, and other areas of contemporary interest.

<b>COURSE OUTLINE</b>	<b>NUMBER OF WEEKS</b>
-----------------------	------------------------

<b>PART 1: LOGIC AND PROBLEM SOLVING</b>	<b>2 WEEKS</b>
--	----------------

**Chapter 1 Thinking Critically**

**1A Recognizing Fallacies**

**1B Propositions and Truth Values**

**1C Sets and Venn Diagrams**

**1D Analyzing Arguments**

**1E Critical Thinking in Everyday Life**

**Chapter 2 Approaches to Problem Solving**

**2C Problem-Solving Guidelines and Hints**

<b>PART 2: QUANTITATIVE INFORMATION IN EVERYDAY LIFE</b>	<b>3 WEEKS</b>
--	----------------

**Chapter 3 Numbers in the Real World**

**3A Uses and Abuses of Percentages**

**3B Putting Numbers in Perspective**

**Chapter 4 Managing Money**

**4A Taking Control of Your Finances**

**4B The Power of Compounding**

**4C Savings Plans and Investments\***

**4D Loan Payments, Credit Cards, and Mortgages**

**4E Income Taxes\***

**4F Understanding the Federal Budget\***

**PART 3: PROBABILITY AND STATISTICS****3 WEEKS**

Chapter 5: Statistical Reasoning  
5A Fundamentals of Statistics  
5C Statistical Tables and Graphs  
Chapter 6: Putting Statistics to Work  
6A Characterizing Data  
6B Measures of Variation  
Chapter 7: Probability: Living with the Odds  
7A Fundamentals of Probability  
7B Combining Probabilities

**PART 4: MODELING****3 WEEKS**

Chapter 8 Exponential Astonishment  
8A Growth: Linear versus Exponential  
8B Doubling Time and Half-Life  
8C Real Population Growth  
Chapter 9 Modeling Our World  
9A Functions: The Building Blocks of Mathematical Models  
9B Linear Modeling  
9C Exponential Modeling

**PART 5: FURTHER APPLICATIONS\*\*****2 WEEKS**

Chapter 11 Mathematics and the Arts  
11A Mathematics and Music  
11C Proportion and the Golden Ratio  
Chapter 12 Mathematics and Politics  
12B Theory of Voting

---

<b>TOTAL</b>	<b>13 WEEKS</b>
<b>REVIEW FOR THE FINAL EXAMINATION</b>	<b>1 WEEK</b>
<b>FINAL EXAMINATION WEEK</b>	<b>1 WEEK</b>

---

<b>TOTAL</b>	<b>NUMBER OF WEEKS IN ONE SEMESTER</b>	<b>15 WEEKS</b>
--------------	--	-----------------

**\*OPTIONAL TOPICS RECOMMENDED FOR STUDENT PROJECTS**

**\*\*FOR FURTHER APPLICATIONS, INSTRUCTORS HAVE THE FLEXIBILITY TO CHOOSE ANY 3 TOPICS NOT LISTED IN THE SYLLABUS BUT ARE IN THE TEXTBOOK.**
